

Wall Covering Adhesive

Professional results made easy

Spray-Lock® Wall Covering Adhesive allows for a faster, cleaner and more environmentally friendly way to install wall coverings. This means more profit for you and more satisfied customers. Since you do not need trowels or guns to apply our adhesive you can apply the adhesive quicker and cleaner and you are able to apply it to a larger area with it's 2 hours of open time. Its instant grab means that you no longer need to brace coverings or worry about them moving once they are up.

Spray-Lock's® Water-Based, 0.0 g/ml VOC formula emits only water as it cures. This is in contrast to other adhesives which release bad smelling solvents and cancer causing chemicals. Our adhesive will never contribute to "Sick Building Syndrome", and with the 80% reduction in adhesive it has a strong environmental impact as well.

Adheres to:

- Plywood
- Drywall
- Water-Resistant Drywall
- Hardiebacker®
- DensShield®
- Melamine
- Plastic Laminates
- Metal
- Wood Laminates
